

GEORGETOWN SOUTH PROJECT CONSTRUCTION UPDATE

The Georgetown South (GTS) Project will provide infrastructure improvements to meet existing GO Transit ridership demand and future growth. It will also accommodate the new Air Rail Link service between Union Station and Pearson International Airport.

Strachan Avenue Overpass – Utility Tunnel Construction Upcoming Saturday Work

What we are doing

- Construction of the utility tunnel – or utilidor – has begun
 - This work is taking place just south of Wellington and Strachan Avenue (the former parking lot behind Strachan House) and within the rail corridor
- The utilidor is a water-tight tunnel that will house utilities that pass under the rail corridor, just east of Strachan Avenue
 - We will be building two vertical shafts, one north and one south of the corridor, and a horizontal tunnel that will run under the corridor, connecting the two shafts

How will this impact you?

- The majority of the work will take place during regular construction hours, Monday to Friday from 7 a.m. to 7 p.m.
 - **Saturday work** on March 19 and 26 from **9 a.m. to 7 p.m.**
 - The work is taking place within the rail corridor or the construction staging area, minimizing the impact along residential streets
- This is regular construction work with normal construction noise from trucks, cranes, construction equipment and little to no vibration impact anticipated
 - There may be an increase in noise during the rock excavation
- Excavated material will be hauled away
- Dust control measures (soil watering) to be enforced and roads monitored for mud and cleaned as needed
