

GEORGETOWN SOUTH PROJECT CONSTRUCTION UPDATE

The Georgetown South (GTS) Project will provide infrastructure improvements to meet existing GO Transit ridership demand and future growth. It will also accommodate the new Air Rail Link service between Union Station and Pearson International Airport.

Queen Street West Bridge Road Closure: April 15-18

Project Description

Between April 15 and 18, 2011, the first of two new spans will be installed on the east side of the Queen Street West bridge (at Queen and Dufferin Streets) to accommodate additional tracks. The work involves modifying the existing concrete abutments and installing the new span. Most of the work has been from above.

Road closure for installation of the new span

- Closure of Queen Street West between Gladstone Avenue and Dufferin Street

April 15 to April 18

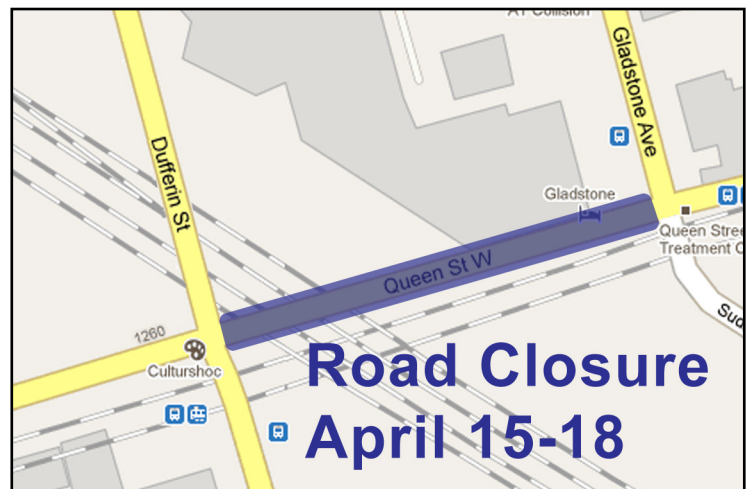

- Full road closure from **Friday at 9 p.m. to Monday at 5 a.m.**

April 18 to April 22

- Middle lane restrictions

April 25 to April 29

- Curbed lane restrictions

How will this impact you?

- This is routine construction work, with normal construction noise from trucks, cranes, construction equipment and little to no vibration impact anticipated
- Vehicular traffic will be redirected along Dufferin Street to Peel Avenue to Gladstone Avenue
- Pedestrian access will be maintained at all times – on one side of the street or the other – except during the span installation on April 16
 - During this time, all sidewalks will be closed at the bridge for a brief period of time
 - There will be two paid duty officers, one at Dufferin Street and one at Gladstone Avenue, to help direct traffic
- TTC buses will provide service in place of the 501 Queen streetcar from the evening of April 15 to evening of April 22
 - For further details on TTC service during this closure, please contact the TTC at (416) 393-4636 or www.ttc.ca
- There will be some additional work after the span is installed
 - This work will include standard site clean up and should have minimal impact on traffic or the community
 - A second span will be installed at a future date and will require a similar road closure at that time
