

The Georgetown South (GTS) Project will provide infrastructure improvements to meet existing GO Transit ridership demand and future growth. It will also accommodate the new Air Rail Link service between Union Station and Pearson International Airport.

Weston Construction Update – June 2011

Lawrence Avenue Bridge Construction

Project Description

To accommodate increased service on the Georgetown South Rail corridor, GO Transit will be adding two tracks to the rail overpass at Lawrence Avenue, east of Weston Road. This will require widening of the GO bridge span that crosses Lawrence Avenue.

What We Are Doing

Most of the work on the Lawrence Avenue bridge will be completed from above and off site. The construction will require the widening of the piers. A crane will be used to lift the bridge span into place. **The construction will begin in July and will be completed in early 2012.**

How Will This Impact You

During most of the bridge construction, Lawrence Avenue will remain open to traffic, however at times, lanes will be reduced to accommodate work. A full closure of Lawrence Avenue for a weekend will be required to install the new bridge span. Advanced notice will be provided of any road closures and construction work outside of our regular construction hours of Monday – Friday 7 a.m. – 7 p.m. and Saturdays 9 a.m. – 7 p.m.
