

The Georgetown South (GTS) Project will provide infrastructure improvements to meet existing GO Transit ridership demand and future growth. It will also accommodate the new Air Rail Link service between Union Station and Pearson International Airport.

ACCESS ROUTES FOR DENISON ROAD GRADE SEPARATION PROJECT

What We Are Doing

There will be 3 points of entry that will be designated for use by the contractor to construct the next stages of the Denison Road Grade Separation: **Arthur Street**, **Denison Road East**, and **Clouston Avenue** – with a secondary point of access at **Lippincott Street East** to be used if needed. The routes and entry points are shown in the above figure. Having multiple points of entry will minimize traffic on any one particular street.

How Will This Impact You

You will see trucks and construction workers making use of the point of entry and entry route. At Clouston, removal of hedges and shrubbery will be done and a gate inserted. Overall, this work is scheduled to start **September 27, 2011** and will continue until the end of the project, spring 2013.
