

GEORGETOWN SOUTH PROJECT CONSTRUCTION UPDATE

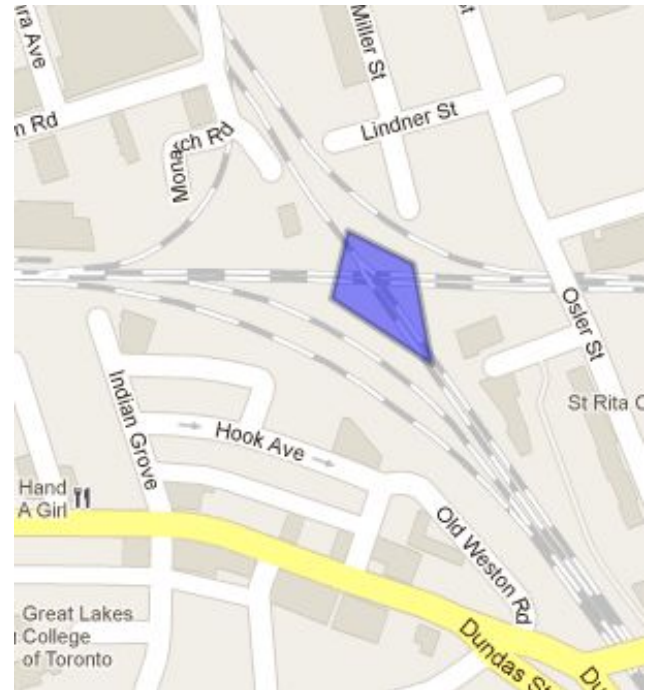

The West Toronto Diamond Grade Separation Project is an important rail infrastructure project that will eliminate a major bottleneck at the most heavily used rail crossing in Canada. When completed, the GO trains on the Georgetown line will pass below CP Rail freight lines, and this will improve service reliability, reduce noise, and allow for future service improvements to reduce congestion in the northwest of Toronto.

West Toronto Diamond – Weekend Work

Weekend work on September 24 - 25, October 1 - 2, October 15 - 16

What we are doing

Work will take place over three weekends: September 24 - 25, October 1 - 2, and October 15 - 16 to complete the installation of small diameter piles called “micropiles” and temporary shoring. Micropiles will be used to support temporary bridge spans that are needed to enable construction of the permanent bridge structure that will support CP Railway’s tracks. Other work will also be carried out on GO’s tracks during this closure period when no GO or VIA trains will be operating.

How this will affect you

Micropile installation produces low noise levels with minimal to no vibration. Much of the limited noise will come from the hissing of the machinery. Construction workers will be on site from 7:00 a.m. to 9:00 p.m. However, the vast majority of the work will take place between the hours of 9:00 a.m. to 7:00 p.m.

We thank you for your continued patience as we continue to complete this project safely.
