

The **Georgetown South (GTS) Project** will provide infrastructure improvements to meet existing GO Transit ridership demand and future growth. It will also accommodate the new Air Rail Link service between Union Station and Pearson International Airport.

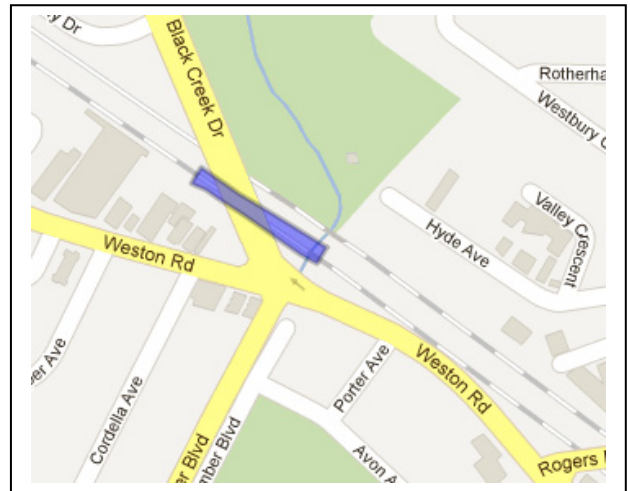

Black Creek and Black Creek Drive Bridge Widening Starting Soon

What we are doing

We are widening the bridges over Black Creek and Black Creek Drive to accommodate additional tracks. The work involves modifying the existing concrete abutments, which hold up the tracks, and installing new bridge spans. These new tracks are required to expand GO service and accommodate the new Air Rail Link service. This work will be completed in 2013.

How this will affect you

- Our contractor, Dufferin Construction Company, has begun to set up on site.
- Work to expand the concrete abutment on Black Creek Drive will begin soon and will include the installation of steel “H” piles to create the foundation to support the bridge. The piles are necessary to reach deep into the ground to find soil conditions capable of supporting the bridge.
- Piles will be installed using shrouded impact hammers. Nearby residents can expect to hear noise and feel vibration from this type of installation. The shrouds will minimize the noise. We are monitoring noise and vibration levels throughout the work.
- We will maintain vehicle and pedestrian access during construction, where possible, and will communicate in advance when temporary road or lane closures are required on Weston Road or Black Creek Drive.

**We apologize for any inconvenience this work may cause and thank you for your patience as we complete this work as fast and safe as we can.
We will communicate further details as they become available.**
