B. Brief Project Description Metrolinx is proposing to expand GO rail services from 500 m west of Brock Street in the Town of Whitby to 500 m east of Regional Road 42/Darlington-Clarke Townline Road in the Municipality of Clarington. The approximately 25 km long Project Limits will occur in the Regional Municipality of Durham (upper-tier municipality) and the Town of Whitby, the City of Oshawa and the Municipality of Clarington (lower-tier municipalities). A maintenance facility yard is proposed within the Town of Whitby, immediately south of Victoria Street, east of South Blair Street, west of Thickson Road, in the area of Hopkins Street, and north of the Canadian National Rail (CNR) line.	

Future GO services will be realigned from the CNR line to the CPR line via a Highway 401 bridge crossing. A GO station is being proposed south of the existing CPR main line, west of Thornton Road in the City of Oshawa and will be serviced by the proposed highway crossing.

Three (3) additional GO stations are proposed through the remainder of the Project Limits on CPR corridor with a fourth site identified for a future potential station. One (1) of which is located in Central Oshawa, bounded by south of Olive Avenue, east of Albert Street, west of Ritson Road, and north of First Street. The remaining proposed stations are located in the Municipality of Clarington. One station is proposed south of Bloor Street, east of Trulls Road, west of Courtice Road, and north of the CPR. An additional station, located in Bowmanville is being proposed south of Highway 2, west of Martin Road, and will be located on both sides of the CPR line.

The fourth site, identified for a future potential station, is located east of Bloor Street and south of Grandview Drive South. In addition, a train layover facility is also being proposed within the Municipality of Clarington, south of Baseline Road, east of Solina Road, west of Rundle Road, and south of the CPR line. It is noted that that first phase of expansion will provide all day service to Central Oshawa, with a.m. and p.m. peak service to Bowmanville with the ultimate plan to have all day service to Bowmanville when demand warrants. With this in mind, the purpose of this transit project is to provide the required infrastructure improvements and address the existing and future projected ridership demand requirements to/from Durham Region.
