

TRANSFORMING TRANSIT IN YOUR AREA

Don Yard Expansion Project

Over the next ten years, Metrolinx is transforming the existing GO rail system to deliver a whole new rapid transit experience to your community. The existing Don Yard storage facility needs to be upgraded and expanded to accommodate current and future growth in the Union Station Rail Corridor.

Metrolinx is committed to updating our neighbours along the USRC about developments on this project and we are writing to provide you with information regarding some upcoming construction.

THE LOCAL PROJECT

Through the week, Metrolinx will be reconstructing the Harbour Lead from **Monday, November 20 to Sunday, November 26** between the hours of 7:00pm to 7:30am. This work will be taking place on the south side of the corridor between **Lower Sherbourne and Cherry Street**.

Please note: For the purposes of safety, work times are subject to appropriate weather conditions.

WHAT TO EXPECT

We recognize that this work can be disruptive to residents and we are doing our best to carry out this essential construction with the least disruption possible.

Due to train movement within the Don Yard facility and Union Station Rail Corridor, work that requires tracks to be taken out of service can only be carried out during off-peak times, when there is less train traffic. Nearby residents may notice some activity from construction equipment and lights in the rail corridor during this time. We will ensure any lights are directed away from homes when possible.

If you have any questions, or would like to be included on future communications, please do not hesitate to contact Ryah Kazman at (416) 202-4422 or Ryah.Kazman@metrolinx.com
