

Vibration Results

Maximum Peak Particle Velocity (PPV)

25 mm/s - GROUND VIBRATION LEVEL LIMIT ADOPTED BY CITY OF TORONTO (BY-LAW NO.514-2008)

From September 7th to 10th, neither the Impact or Vibro hammer were operating. Therefore the higher ambient levels recorded on these dates were likely the result of the non-impact/vibro piling related activities and/or electrical interference in close proximity to the instrumentation.
