Community Bulletin: Union Station Rail Corridor (USRC) Portland Street Pedestrian Bridge

Dear Neighbour:

The City of Toronto has begun construction of the Portland Street Pedestrian Bridge which will span the rail corridor between Bathurst Street and Spadina Avenue.

The work is being done in partnership with PCL Constructors Canada Inc. and Concord Adex. In order to facilitate this construction the City has closed a portion of the Front Street eastbound curb lane in this area. Neighbours can expect some daytime weekday drilling and related noise from the site. This work is expected to last until August 2011.

Once complete the Pedestrian Bridge will significantly improve resident access to either side of the corridor.

Should you have any questions or concerns, key contacts for this project are:

Concord Adex (Developer), Jeff Wilkinson, Project Manager, 416-813-2906

PCL Constructors Canada Inc. (Contractor), Romeo Llamzon, Project Manager, 416-806-0340 x.236

Sincerely,

Stacey Kenny

Construction Communications, USRC Infrastructure
