MILTON CONSTRUCTION UPDATES

In the last few months, we've made a number of changes at our stations including updating amenities, enhancing accessibility, and making it easier to access GO services.

GO Expansion will increase the frequency and number of GO trains across our network, reduce congestion and connect a growing region with fast, reliable transit options to get you where you need to go.

Learn about more service and improvements planned for your corridor at metrolinx.com/milton-go-expansion.

What's Changed

Erindale GO

Improvements Made:

- New yellow safety tiling on the train platforms

Work In Progress:

- New digital signage on train platform
- New digital signage in the bus loop

Completion Date: June 2020

For more information on Erindale GO improvements click here

Streetsville GO

Improvements Made:

- New digital signage on train platform

Completion Date: June 2020

What's Changing

**Kipling GO**

**Construction Map**

---

**Work Completed/In Progress:**

- New bus terminal

**Current Customer Impacts:**

- The Subway Crescent Lot and North Lot are closed. Customers can use the spaces in the South Lot as a parking alternative during this time.
- There is no elevator access to the north or the south side of the station. If you require the use of an elevator, please use Dixie GO Station.

**Future Customer Impacts:**

- The temporary Kiss & Ride (passenger pick-up and drop-off) along Auckland Road will close later this year. A new paid TTC parking lot is being built in this area.
Customers should use the paid TTC south parking lot via Munster Avenue to access the train platform and GO Station building.

Completion Date: 2021

Cooksville GO

Construction Map

Work Completed/In Progress:

- New parking structure
- New station building
- New bus bays
- Platform improvements

Current Customer Impacts:

- All parking spaces on the main lot west of Hurontario Street are closed for resurfacing until the end of 2020. There is ample space, including carpool and accessible parking spots, available in the parking garage.
- The west side of the platform is open while we work on the east side of the platform and the east tunnel.
- Use the west tunnel inside the parking structure to access the platform. The tunnel is located one level below the ground floor.
- You can no longer access the platform and train from Hurontario Street. Please access the station from Hillcrest Avenue. The walk will add 10 to 15 minutes to your travel time to catch your bus or train.
- We’ve closed the current Kiss & Ride and opened a new one on the east side of the station.
- There’s a new bus loop on the north side of the parking garage, giving you easier access to the pedestrian tunnel inside the garage.
- Only GO buses will use the new bus loop for now. MiWay buses will drop off and pick up passengers at the north-west corner of Hurontario Street and John Street. Miway buses will start using the permanent bus loop when the extension of John Street is complete.

Future impacts:
- We expect parking lot D, west of GO Access Road, and the remaining portion of John Street to open for you soon.
- The East Pavilion, pedestrian bridge, east tunnel and the east side of the platform, will open later this Fall for you to use.

How You’ll Benefit
- New station building with a large public plaza
- 800+ more parking spaces from the addition of a new parking structure complete with a pedestrian bridge to the rail platform
- 8 new bus bays for GO and MiWay bus service
- Upgrades to pedestrian tunnels to access rail platforms
- New platform with tactile yellow tiles, digital signs, canopied shelters and a snowmelt system
- Repairs to parking lots
- New station entrance from Hurontario Street

Completion Date: 2021

Milton GO

Construction Map

Work Completed/In Progress:

- 850 additional parking spaces

Current Customer Impacts:

- About 150 parking spaces in the northwest parking lot are closed for construction.
- There’s plenty of parking available at the station and there are 204 designated spaces for GO customers at the Real Canadian Superstore parking lot across the street.

Future Impacts:

- We expect some of the parking spaces to re-open when construction is complete later this year.

Completion Date: Fall 2020
